

Langenfeld, January 2021

Werner Deuring, sole shareholder and CEO of the Deurotech Group, appoints his son Alexander Deuring as COO of the Deurotech Group

Alexander Deuring has been appointed to the position of Chief Operating Officer (COO) of the Deurotech Group as of January 1st, 2021. As COO, Alexander Deuring will be responsible for the digitization, controlling and increasing efficiency.

Alexander Deuring has been working in the field of Business Development for the Deurotech Group since the beginning of 2018. After completing his high school studies in industrial engineering at the HTL Bregenz, he graduated in International Economics, Management and Finance from Bocconi University in Milan and completed his Master in Management degree at IE Business School in Madrid. Prior to joining the Deurotech Group Alexander Deuring worked in the industrial and financial sector.

The Deurotech Group is a group of businesses specializing in the wood-based panels and paper industry as well as in environmental technologies. The machinery and plant engineers Vits Technology and IFA Technology offer coordinated process technology in surface converting from a single source: impregnation and coating lines as well as systems for resin preparation. Airprotech, Wessel-Umwelttechnik and Eisenmann Environmental Technology manufacture systems for biological and thermal exhaust air purification and energy recovery, water purification and wastewater treatment, waste disposal and material recycling, biogas plants, as well as systems for ammunition disposal.
